

Nowadays we feel more and more responsible for the world we live in and for our own well-being. The use of ecologically sound products benefits ourselves as well as a world in balance.

Ecogarrantie® is the quality label for ecological products. Ecogarrantie has developed standards for **cosmetics, personal care, washing and cleaning products and salt.**

These kinds of products contain minerals, which can not be organically certified. However, **Ecogarrantie® retains the link with the organic sector in its criteria.**

You can rely on the fact that products with the Ecogarrantie® label meet strict requirements, guaranteeing **quality, safety and sustainability for generations to come.** **Sustainable development** integrates **ecological aspects** like the renewability of resources, social aspects like fair trade and **economical** aspects like the profitability of companies.

What is Ecogarrantie®?

Clear rules and complete labeling of Ecogarrantie® products guarantee **full transparency** towards consumers and companies.

Ecogarrantie® products are controlled by **independent and objective control** and certification bodies, Ecocert and Integra.

This ensures that your cosmetics, personal care, washing and cleaning products, and sea salt are 100% ecologically sound and naturally efficient.

Companies manufacturing ecological products are convinced of the importance to respect the natural cycles of life. Ecogarrantie® supports them in their commitment offering them the label, the standards and the expertise -on an international level- of its members.

Ecogarantie® criteria:

- ▶ **Plant and animal products originate from organic farming**
- ▶ **Minerals are carefully selected**
- ▶ **Chemically synthesised ingredients and petrochemical ingredients are banned**
- ▶ **No use of genetically modified organisms**
- ▶ **Minimal impact on the environment**
demanding perfect biodegradability, no toxicity for aquatic organisms and no bioaccumulation of toxins in the human body
- ▶ **No testing of end products on animals**
- ▶ **Ecologically sound production methods**
meaning no irradiation of products for disinfection, use of green energy and reduction of CO2 emission
